Launch Islamic Finance Products in Months, Not Years

Fintechs across Saudi Arabia and the GCC are racing to launch digital-first financing products that meet customer expectations, support Shariah-compliant structures, and scale with market demand.

TurnKey Lender helps make that possible with one configurable platform for Shariah-ready origination, decisioning, servicing, collections, and reporting, giving fintech teams the infrastructure to launch faster and grow with confidence.

One Platform Across the Lending Lifecycle

- Origination
- AI-assisted decisioning
- Servicing
- Collections
- eSignature
- Reporting
- Open banking integrations
- Portfolio growth

Why TurnKey Lender

Built for Financial Services Across the GCC
Purpose-built to help fintechs, banks, and finance providers launch, manage, and scale digital Islamic finance products across the region.

- Supports Arabic and English borrower journeys
- Configurable Islamic financing structures
- Open banking ready
- National ID and digital onboarding integrations
- SME and consumer financing support
- Multi-entity and multi-country operations
- Designed for evolving regulatory environments

Configured to support Shariah-compliant finance

Support Islamic finance terminology, Murabaha-based product structures, approval flows, repayment logic, document templates, and agreement language aligned with internal Shariah governance and local compliance requirements.

Prioritize speed from launch to scale

Automate application intake, data capture, decisioning, document generation, eSignature, servicing, collections, and reporting in one connected workflow.

Mobile-first borrower journeys

Deliver simple, white-labelled digital experiences designed to reduce friction, improve onboarding, and help more borrowers complete the financing journey.

API-agnostic integrations

Connect to local and global KYC/KYB tools, payment providers, CRMs, accounting systems, credit bureaus, digital identity services, and open banking infrastructure.

AI-powered lending operations

Move beyond workflow automation with AI capabilities that help teams assess risk, flag anomalies, automate document review, prioritize collections, generate portfolio insights, and improve underwriting consistency.

Decisioning control and human oversight

Configure rules, scorecards, review paths, and AI recommendations according to your governance and compliance needs so teams can accelerate decision-making while keeping human oversight where it matters.

Designed for regulated growth

Prove performance and scale lending capacity with infrastructure built for volume, control, and compliance across onboarding, underwriting, servicing, collections, and reporting, then expand without rebuilding.

Support built around your business

Work with dedicated project and account management, unlimited support tickets, and coverage aligned to your time zone, from requirements gathering to go-live and beyond.
